Earth Light, Ceiling Mount – Speckled White Satin

The Earth Light has been designed in wall, pendant and ceiling mount formats. The elemental geometric form is both simple and architectural; all fittings are thrown on a potter's wheel giving each light a unique quality and a surface rich with the evidence of its handmade process.

The fitting can be purposefully used in wall, pendant and ceiling mounted formats across a range of residential and commercial environments. The wall and pendant fittings are available in two sizes and the wall light is available in an indoor and outdoor installation option. Electrical componentry and the mounting system are designed to complement the handmade nature of ceramics.

After an initial firing, the fittings are hand finished with glazes developed for the lighting collection and then fired one final time. Inspired by place, clay body and glaze fit are developed together inhouse to the highest standard.
